6 months in used French oak barrels and 6 months in the bottle before release.
- **Production**
4663 bottles.

It is well known by scientists and ancient growers the influence the moon has in life, in all the events in which gravity and liquids are involved.

Grape growing practices and winemaking are also induced by the moon, with more intensity when it is full.

The energy of the full moon was captured in this Luna Llena Gran Malbec.

All processes like pruning, harvesting, crushing, pressing, racking and bottling were made during these luminous nights.

It shows the quality and power of the grapes. Biotechnology such as cultured yeast, enzymes, bacteria or fining agents were not applied.

You are invited to taste and feel the particular energy contained in this wine.
