It is well known by scientists and ancient growers alike, that the influence of the moon in all aspects of life is extraordinary, but particularly in the events in which gravity and liquids are involved.

Grape growing practices and winemaking are also greatly inspired by the moon, especially when it is full.

The energy of the full moon was captured in this Luna Llena Gran Malbec as the entire process was performed under the most powerful and vibrant nights, including the harvesting of its grapes.

You are invited to taste and feel the particular energy contained in this wine.
